

eIVF Release Notes

eIVF 5.0 Build 337

Release Date: April 15, 2024

Enhancements	
Custom Labels	<ul style="list-style-type: none"> The following labels have been created. Please submit a request to support@eivf.net to enable on your system. <p>Demographics & Schedule Label – Includes Patient Name, DOB, DOS, DOR, PID and Chart ID. Note that DOS populates today's date if printed from Demographics screen. Label ID-48 (demographics) / Label ID-27 (Schedule)</p> <div style="border: 1px solid black; padding: 5px; width: fit-content;"> <p>TEST, Jenny DOB: 12/10/1980 DOS: 04/05/2024 DOR: Emily Johnson, MD PID/Chart #: 8288/8288</p> </div>
Billing (1.2024.03.05)	<ul style="list-style-type: none"> Users can now add medication procedures to the Billing List Table, allowing quantity changes without affecting the charge amount.  <ul style="list-style-type: none"> Users have now the ability to clear credit from EOB screen. Users now have the ability to tab over without having to set a term date in default charges.
Bugfixes – General bug fixes including the following:	
Flowsheets	<ul style="list-style-type: none"> Resolved issue where user removes a link to another cycle, it continues to show as linked on the flowsheet.
Ultrasound	<ul style="list-style-type: none"> Fixed bug where ultrasound results were not displayed in the Review Note (Progress Note) when the ultrasound lab type was SSG.
Consents	<ul style="list-style-type: none"> Fixed issue where in some cases when a user is using the e-signing feature, when they add a name to a signature box, the name of the last person who has signed the form is being automatically added to the box for initialing.
Documents	<ul style="list-style-type: none"> Resolved issue where user would get an error when opening a document for certain templates.

QuickNotes	<ul style="list-style-type: none"> Issue was resolved where in some cases users would lose their shorthands in the QuickNotes. When this happened the user would need to click Save on their Shorthands in system setup to restore the shorthands.
Queries	<ul style="list-style-type: none"> Resolved issue where user would sometimes see an Invalid date error/ Conversion date error when run the query if day was 13-31. This only happened when user was running query on a different date format than eIVF was set to (eg. eIVF is set to dd/mm/yyyy, but user is running the query from computer set to mm/dd/yyyy).
System Setup	<ul style="list-style-type: none"> Increased the character limit of the email field in System Setup > Users.
Embryology (1.2024.01.01)	<ul style="list-style-type: none"> Fixed issue in the cryo report, when user did a re-cryo on two different dates, the printed cryo report showed all embryos had re-cryo on the same day.
Billing (1.2024.03.05)	<ul style="list-style-type: none"> Resolved issue with QTY field logic between Encounter and NDC screens, fixing element CPT04 in x12 file. Resolved issue related to "charge to" and post/claim, the process of selecting insurance would apply to see post/claim. Resolved an issue with Configuration 23 outside facilities unconfirmed events and post/claim. Resolved issue with diagnosis and having the ability to make corrections to an encounter sitting under the status not submitted or rejected. Resolved issue related to the post/claim with unconfirmed status on the screen and user unchecking/checking insurance. Resolved an issue that was occurring when users were attempting to utilize the "charge to feature" option and relation to "Post & Claim" function from the encounter screen.
