eIVF Release Notes

eIVF 5.0 Build 339

Release Date: Nov 5, 2024

Enhancements	
PGT	• Changes to support new Genetics Portal module. This new module will allow users to send PGT or Endometrial test orders and view results from integrated genetic lab vendors.

Bugfixes – General bug fixes including the following:	
Query Engine (2.2024.11.01)	• Resolved issue where users were receiving an error message and unable to export data to excel from the OLAP section in Data Analysis tab.
Progress Notes	• Fixed issue when in some cases while a user is writing a progress note, pressing the backspace key would delete the entire note content.
General Error Messages	• Resolved issue that was causing some error messages to display incorrect message.
eRX (1.2024.9.1)	• Resolved issue with the system generated eRX-Script notes not populating the name of the compound prescribed under the Prescription column of the Medication Order.
